Test pressure is about 116psi, burst pressure is about 232psi, made of aluminum alloy; Operating temperature: 40°F to 257°F (-40°C to 125°C).

[Stacked plate oil cooler has high cooling efficiency and improves oil lubrication. Used to cool the engine, transmission and rear differential. Helps to reduce coolant temperature, maintain low oil temperature and prevent engine damage or clogging, thus extending engine life.]
